TITLE Report on Enrollment, Fall 1987. California Community Colleges Report Number 88-7.
INSTITUTION California Community Colleges, Sacramento. Office of the Chancellor.
PUB DATE Jul 88
NOTE 146p.
PUB TYPE Reports - Research/Technical (143) -- Statistical Data (110)

EDRS PRICE MF01/PC06 Plus Postage.
DESCRIPTORS Academic Achievement; *Community Colleges; Demography; *Enrollment; Profiles; State Surveys; *Student Characteristics; Two Year Colleges; *Two Year College Students
IDENTIFIERS *California

ABSTRACT

A profile is presented of the demographic and academic characteristics of over 1.2 million California community college students who were actively enrolled as of the first attendance-accounting period in fall 1987. Sections I presents student counts and characteristics by districts. Section II presents student counts and characteristics by college. Both sections on enrollments contain data on: (1) number and percent of full-time, part-time, and noncredit students; (2) gender and ethnicity; (3) age; (4) credit enrollment by credit unit workload attempted; and (5) WSCH for regularly scheduled census credit classes and TPHA positive attendance classes. Section III profiles district enrollments by type of student (i.e., full-time, part-time, or non-credit), including data on gender and ethnicity, age, high school completion, level of prior educational attainment, enrollment status, residency, citizenship, and primary student goal. Preface

This is the fifth in a series of reports by the Chancellor's Office profiling California community college students. The statistics in this report are grouped according to colleges and districts and provide a basis for analysts and policymakers to compare changes in student demographic and educational characteristics.

We wish to thank district personnel for their cooperation in submitting student data to the Chancellor's Office. It is only through the efforts of all districts that a report such as this is possible.

District staff should review these tables, not only to perfect data submissions in the future, but also to make suggestions for improving the usefulness and/or presentation of the data. Comments should be directed to the Research and Analysis Unit of the Chancellor's Office at (916) 322-4656.

Under the direction of Chuck McIntyre, Leonard Shymoniak of the Research and Analysis Unit analyzed the data and prepared the various computer programs that produced the summary tables. Jerry Hudson and Janette Otis of the Management Information Services Unit worked with district staff in the collection of the raw data and performed the data processing and maintenance functions.

David Mertes
Chancellor

July 1988

Introduction

This report profiles the demographic and academic characteristics of California's community college students for the 1987 Fall Term. The database for this report is the Student File of the Chancellor's Office Management Information System. This file is a census of over 1.2 million students who were actively enrolled as of the first attendance-accounting period for each of the 106 colleges in the system.

The report is divided into three sections, each consisting of a series of tables:

- Section I presents student counts and characteristics by districts.
- Section II presents student counts and characteristics by individual colleges.
- Section III presents student data by district and according to the full-time, part-time, on noncredit status of students. (Students are defined as full-time if they carry 12 units or more, and part-time if they attempt less than 12 units).

Part-Time vs Noncredit

For the second year, a more precise definition is used to categorize students as part-time or noncredit. In reports prior to Fall 1986, students with missing data for "credit units attempted" were automatically assigned to the noncredit category. Staff now determines whether the students had any contact hours in noncredit classes. If they did, they are classified as noncredit. If they did not, they are now classified as part time. Persons conducting time series analyses should note that this definitional change shifts some student counts from noncredit to part-time, beginning with Fall 1986.

Data Elements

Each section presents data on student gender, ethnicity and age. Sections I and II also make use of the following elements: units attempted, weekly student contact hours (WSCH), and total potential hours of attendance (TPHA).

Age (Element SE1)[1] is computed from the student's birthdate. The code for *gender* (Element S10) indicates whether the student is male, female, or unreported. *Ethnicity* is a code (Element S8) representing the student's racial or ethnic background. A student may be classified as American Indian or Alaskan Native, Asian or Pacific Islander, Black, White, Hispanic, Filipino, Other (persons not fitting into any of the previous categories), or Non-respondent.

[1] Refers to data element number of the *Data Element Dictionary* issued by the Chancellor's Office.

Units attempted (Element SE7), is defined as the total number of units of credit generated by credit courses in which a student is actively enrolled as of the first census. The tables present the number and percentage of students enrolled in each credit-unit group. Credit enrollment is a count of the total number of students taking one or more credit courses in that district or college. That is, students enrolled in both credit and noncredit classes are labeled "credit," whereas those enrolled exclusively in noncredit classes are labeled "noncredit."

WSCH (Element S17) is the total number of hours which a student spends in class during the first census week. WSCH is reported only for those students who are actively enrolled in full-term census courses offered for credit. *Total Potential Hours of Attendance* (TPHA) (Element S14) is another measure of contact hours. TPHA is the product of active class enrollments and total scheduled course hours for credit and noncredit, noncensus attendance accounting classes.

Section III includes the use of five additional variables. These are: type of high school education, level of academic achievement, enrollment status, citizenship status, and student goal.

The *type of high school education* (Element S5) refers to the kind of diploma or certificate held by the student. The options include: high school diploma, G.E.D., certificate of equivalency, certificate of California high school proficiency examination, certificate of completion, and foreign secondary school diploma or certificate of graduation. In addition, the student may not be a high school graduate or the high school degree status may be unknown.

The *student's level of academic achievement* (Element S13) is determined by the number of credit units completed at an accredited institution prior to registration for the term. *Enrollment status* (Element S4) is a code that indicates the student's current standing at the reporting college. A new student may be a first-time student or a first-time transfer student. A student who has previously attended the reporting college may be a returning transfer student, a returning student, or a continuing student.

The citizenship status (Element S2) indicates whether or not the student is a United States citizen. If the student is not a citizen, then the kind of visa is noted. Kinds of visas include immigrant, refugee, student, other, and unknown.

The *student's goal* (Element S12) is the educational aim of the student and includes the following variables: transferring to another institution of higher education with or without a degree, pursuing an AA or AS degree in either general or vocational education, or seeking a certificate or job skills.

In all tables, unknowns are excluded for purposes of computing percentage distributions.
